

Safety Data Sheet

1. Identification of the Material and Supplier

Product Name: MaxiFlox® 545
Supplier: Science Developments Pty Ltd
ABN: 96 001 815 363
Address: Suite 105, 48 Atchison Street
St Leonards NSW 2065 AUSTRALIA
Contact Details: +61 (0) 427 501 274
admin@scidev.com.au
Emergency Telephone: 13 11 26 (Poison Information Hotline)
Recommended Use: Industrial wastewater treatment

2. Hazards Identification

Classification of the Chemical: Not classified as hazardous according to the GHS criteria.
Non-Dangerous Goods according to the ADG Code.

Statement of Hazard: H317 May cause an allergic skin reaction.
AUH066 Repeated exposure may cause skin dryness or cracking
H319 Causes serious eye irritation

Precautionary Statement Prevention: P102 Keep out of reach of children.
P264 Wash hands thoroughly after handling.
P270 Do not eat, drink or smoke when using this product.
P280 Wear protective gloves / protective clothing / eye protection.

Response: P302+P352 IF ON SKIN: Wash with plenty of soap and water.
P333 + P313 If skin irritation or rash occurs: Get medical advice / attention.
P305 + P351 + P338 **IF IN EYES:** Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do. Continue rinsing.
P337 + P313 If eye irritation persists: Get medical advice / attention.
Very slippery when wet.

Storage: Avoid dust formation and ignition sources. Ensure good ventilation.

Disposal: P501 Dispose of contents and container in accordance with local, regional national and international regulations.

3. Information of Ingredients

Product Name: Anionic polyacrylamide

4. First Aid Measures

Contact with skin: In case of contact, wash affected skin with soap and plenty of water. Immediately remove contaminated clothing. Get medical attention if skin irritation or dermatitis commences or persists.

Contact with Eyes: Rinse with plenty of water for 15 minutes. Get medical attention if persists.

Ingestion: Do NOT induce vomiting. If unconscious, do not give anything by mouth. If conscious, rinse mouth; then drink one or two large glasses of water. Contact a doctor or the Poisons Information Centre (In Australia Phone: 13 11 26).

Inhalation: Minimal vapour present. Remove to fresh air if symptoms occur.

Medical / Special Treatment: No specific treatment. Treat symptomatically.

5. Fire Fighting Measures

Recommended extinguishers: Not combustible, however, if material is involved in a fire use: Normal foam, dry agent (carbon dioxide, dry chemical powder).

Specific Hazards; Non-combustible material.

Protective equipment and Precautions: Fire fighters to wear self-contained breathing apparatus and suitable protective clothing if risk of exposure to products of decomposition.

6. Accidental Release Measures

Measures for personal safety: Use suitable protective equipment (PPE). Spills are slippery.

Environmental precautions: Avoid dispersal of spilt material and prevent contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution.

Containment and clean up: Stop leak if without risk. Move containers from spill area. Prevent entry into sewers water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, common salt (sodium chloride), silica gel, diatomaceous earth and place in container for disposal according to local regulations (see section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product.

7. Handling & Storage

Handling precautions: Do not ingest. Avoid contact with eyes and skin. Keep in original container or an approved alternative made from a compatible material. Keep tightly closed when not in use. Slip hazard when wet.

Storage conditions: Avoid dust formation and ignition sources. Keep container tightly closed in a dry, cool and well-ventilated area. Protect from heat and avoid extremes of temperature. Store away from foodstuffs. Protect from water and moisture.

8. Exposure Controls/Personal Protection

Exposure control measures: DUST. TWA value: 10mg/m³

Engineering controls: Provide appropriate exhaust ventilation where dust can be generated. Ensure adequate ventilation, especially in confined areas.

Hygiene measures: Ensure that eyewash stations are close to the workstation location.

Respiratory protection: Wear respiratory protection if ventilation is inadequate

Protection for hands: PVC oil /chemical resistant gloves.

Eye protection:	Tightly fitting safety goggles (chemical goggles).
Protection for skin:	Chemical resistant apron and lightweight protective clothing

9. Physical and Chemical Properties

Physical state:	Powder
Colour:	White
Odour:	None
Melting point:	Not available
Vapour pressure:	Not available
Density:	Approx 0.75 g/cm ²
Flash point:	Not available
Vapour density:	Not available
pH of 1% solution:	Approx 6.5
Water solubility:	Forms a viscous solution

10. Stability and Reactivity

Chemical Stability:	The product is stable under normal ambient conditions of temperature and pressure.
Hazardous Reactions:	No hazardous reactions expected.
Conditions to avoid:	Avoid temperature extremes. Avoid humidity. Avoid all sources of ignition.
Incompatible materials:	No incompatible materials expected. Avoid reactive chemicals.
Hazardous decomposition products:	No decomposition expected under normal storage conditions.

11. Toxicological Information

Ingestion:	Not tested
Eye Contact:	Not tested
Skin Contacts:	Not tested
Inhalation:	Not tested
Carcinogenicity:	No known significant effects or critical hazards.
Mutagenicity:	No known significant effects or critical hazards.
Reproductive toxicity:	No known significant effects or critical hazards.

12. Ecological Information

Ecotoxicity:	Not available
Persistence and degradability:	Not available. In contact with water the product will hydrolyse quickly.
Bio-accumulative potential:	Accumulation in organisms is not to be expected. This product has not been tested.
Mobility in soil:	Not available
Other adverse effects:	No known significant effects or critical hazards

13. Disposal Considerations

The generation of waste should be avoided or minimised wherever possible. Avoid dispersal of split material and runoff and contact with soil, waterways, drains and sewers. Refer to Waste Management Authority. Dispose of contents and container in accordance with local, regional, national and international regulations.

14. Transport Information

Not classified as Dangerous Goods by the criteria of the Australian Dangerous Goods (ADG Code) for transport by Road and Rail: **NON-DANGEROUS GOODS**

15. Regulatory Information

Safety, health and environmental regulations: All substances are listed on the Australian Inventory of Chemical Substances (AICS).

AU Classification: Not classified as hazardous according to Safe Work Australia.

Control of Scheduled Carcinogenic Substances No listed substance.

16. Other Information

This safety data sheet has been prepared by Science Developments Pty Ltd. Reason for Issue: Updated information

This SDS summarises to our best knowledge at the date of this issue the chemical health and safety hazards of the material and general guidance on how to safely handle the material in the workplace. Since Science Developments Pty Ltd cannot anticipate or control the conditions under which the product may be used, each user must, prior to usage, assess and control the risks arising from its use of the material.

If clarification or further information is needed, the user should contact Science Developments Pty Ltd as per the contact details on page 1.
